## **HOME PROGRAM: Advanced Oral-Motor Exercises, Articulation Version A**

Set time aside for oral-motor exercises each day. Take care to allow enough time to not rush through these exercises, but to perform them as accurately as described as possible. Oral-motor exercises involve fine-motor skills, so precision is important. These exercises will aid in building strength, increased range of motion and improved coordination for speech articulation.

### **Instructions:**

- Sit in front of a mirror that allows for a good view of the mouth area.
- Take short breaks and moisten your mouth as indicated.
- A tongue depressor is needed for this list of oral motor exercises.
- Perform these exercises twice a day.

---

## **TONGUE**

### **SLOWLY:**

Stick your tongue forward as far as possible against the tongue blade. Repeat X 15.

Move your tongue to one side. Provide tongue blade resistance. Repeat X 15
